REQUEST FOR PROPOSAL (RFP)

Bid Event Number: EVT0000694

Environmental Considerations

CCS Presentation Systems and its manufacturer partners are taking great strides to address environmental protection and sustainability issues, develop user-friendly recycling programs, and establish standards to reduce environmental footprints.

In 2008, paperless systems were implemented in many CCS offices throughout the country for all internal project documentation, order tracking, and scheduling.

Recently, all lighting control in the entire 27,000 square foot CCS Scottsdale, National Headquarters, has been converted to energy efficient occupancy sensors.

CCS Presentation Systems has a corporate-wide paper recycling program, coupled with energy savings strategies, shipping and packaging recycling initiatives – all in a concerted effort to remain committed to lowering its carbon footprint across the entire national organization.
